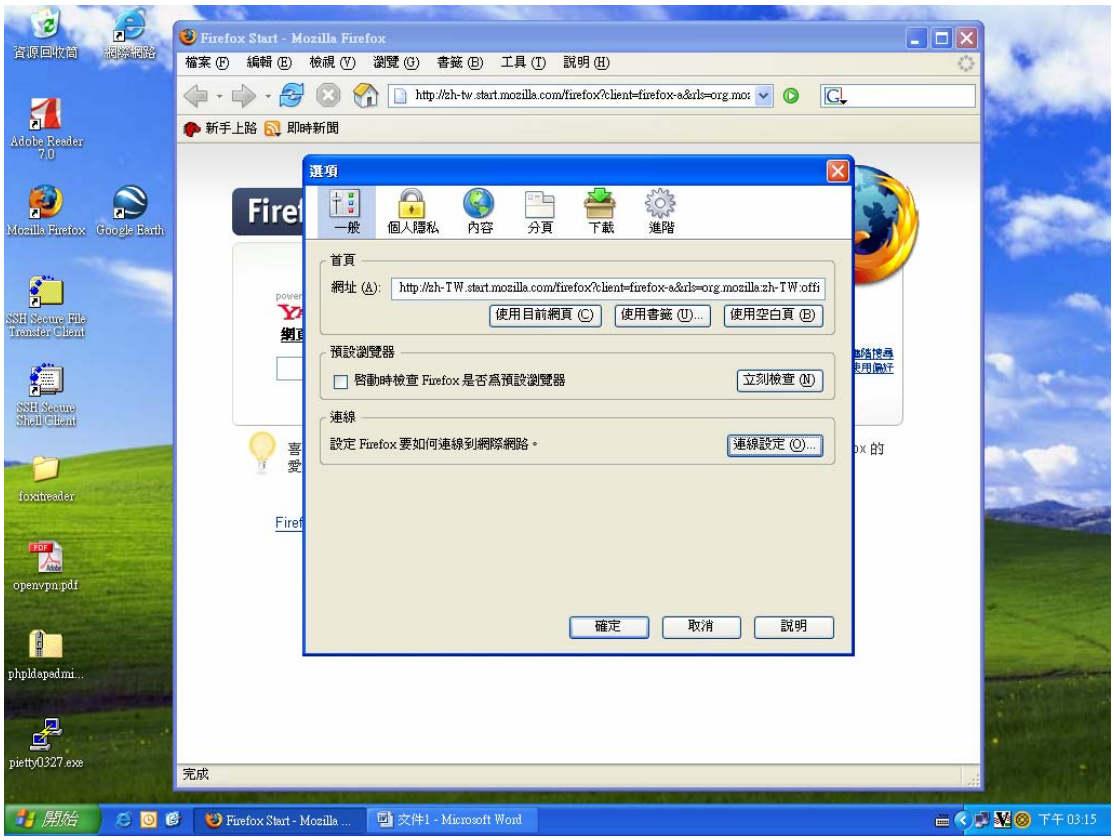
# Windows XP proxy setup tutorial

4/28/2006

By Frank Chen

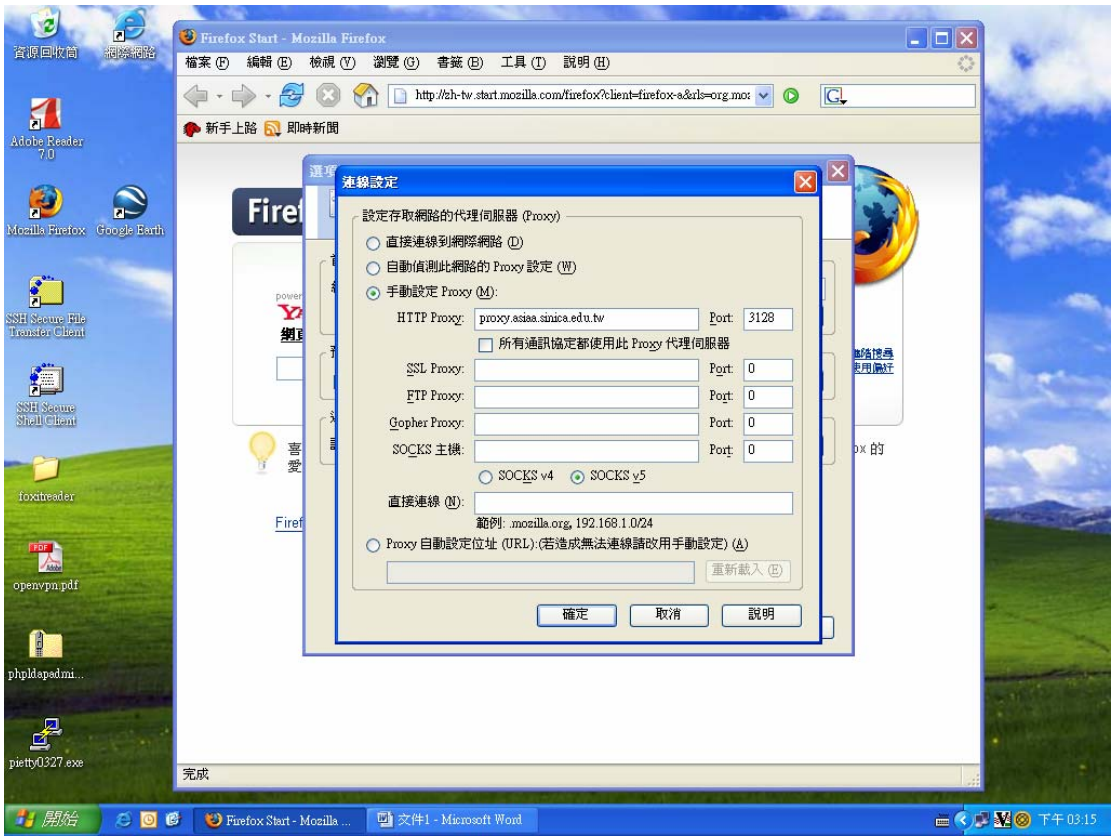
**Start the Firewall browser, go to Tool→Option**

**Under General, click on Connection Setup**

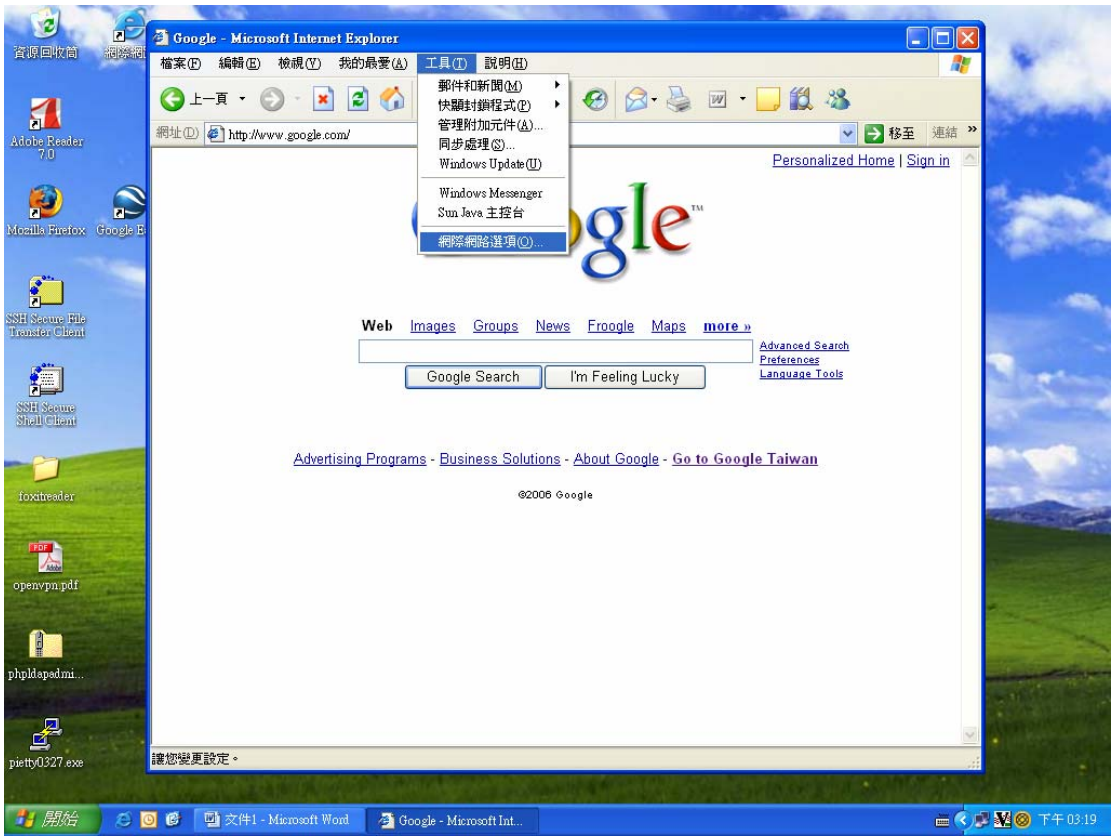


**Click on Manual proxy, under HTPP Proxy column, key in proxy.asiaa.sinica.edu.tw and port is 3128.**

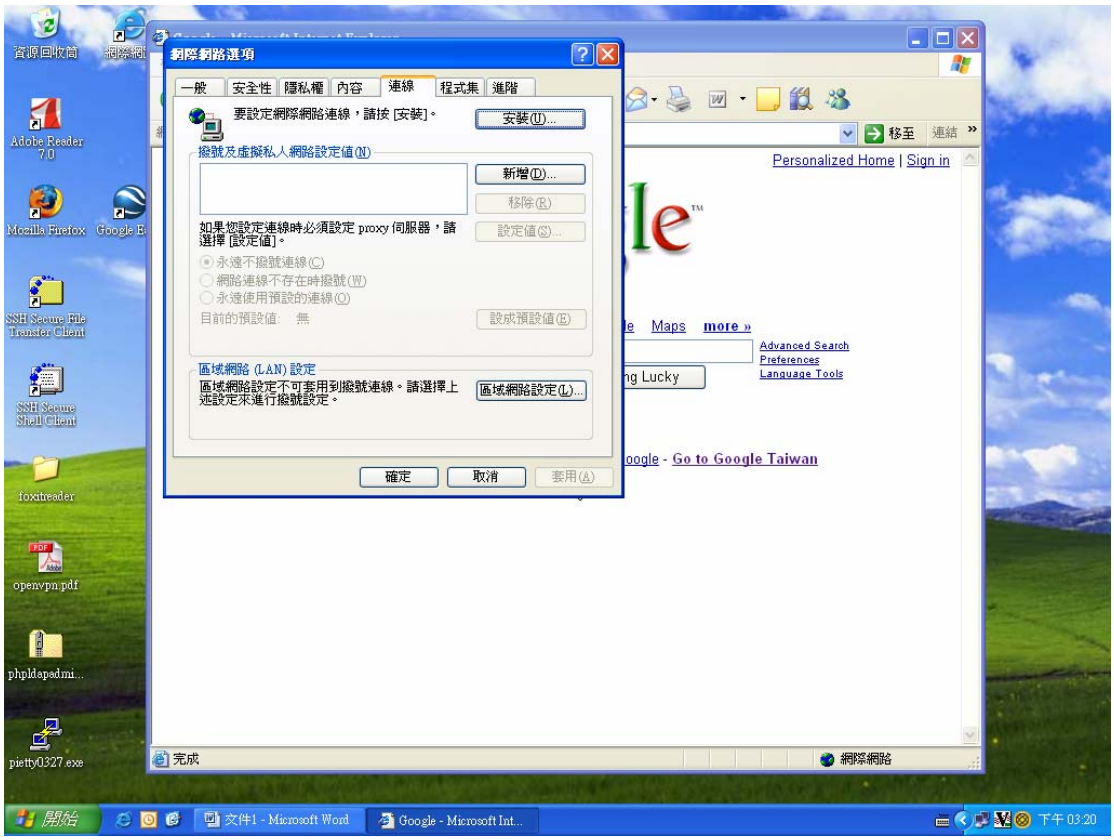
**You are ready to use the IAA proxy from outside of IAA firewall. (for example, to read on-line APJ journals)**



**For Internet Explorer, start the browser then go to Tool →Internet Option**



## Under Connection bar, Click on LAN setup



**In proxy setup column, key in proxy.asiaa.sinica.edu.tw and port 3128. Now you are all set.**
